## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, drawn to an apparatus, classified in class 257, subclass 678.
- II. Claims 26-44, drawn to a method of mounting a flip-chip to a substrate, classified in class 438, subclass 106.

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the group I invention could be made by a materially different process. For example, adhesion the flip-chip to the substrate to draws the flip-chip and the waveguide into engagement, instead of soldering the flip-chip to the substrate to draws the flip-chip and the waveguide into engagement.

Because these inventions are distinct for the reasons give above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2811
